

Comprehensive PLM with the Simplicity & Value of the Web

Today's fashion and softgoods retailers, brands, and supply chain partners are challenged to meet increasing consumer demand for more innovative products with greater frequency and value.

Although global development and sourcing strategies have enhanced creativity and reduced costs, these massive process shifts have significantly increased operational complexity.

To succeed in this challenging business environment, industry leaders and forward thinking AFA companies are recognizing the need to move beyond traditional spreadsheet, email, PDM, and legacy business tools to adopt new, more effective business solutions that can manage the entire global product lifecycle - from concept-to-consumer. These companies are moving up to:

VisualPLM.net®

VisualPLM.net enables fashion and softgoods companies to succeed in this challenging business environment by leveraging the true potential of the internet to deliver the most comprehensive and advanced set of product lifecycle capabilities available today. This easy-to-use and deploy software solution offers companies tremendous value, fast return on investment, and proven strategic business benefits.
