

Mastering the Concept-to-Consumer Fashion Lifecycle

To succeed in today's fast-paced and highly competitive business environment, apparel, footwear, accessories, and other fashion companies must have visibility and control over every stage of their business processes; from design and development to production and customer delivery.

With little room for errors or delays, these retailers, brands, and manufacturers must utilize the latest information technology to speed new products to market, manage global sourcing and supply chain operations, and closely manage inventories and sales.

Fashion leaders are turning to Visual 2000 to ensure their current and future success. With unparalleled fashion-focused capabilities, out-of-the-box simplicity, and speed-to-benefit, these web-based software solutions help more than 400 companies around the globe achieve the speed, efficiency, and collaboration they need to excel in a challenging global marketplace.

End-2-End™ Solution

With its revolutionary End-2-End Solution, Visual 2000 combines all the tools and information fashion companies need to succeed in a single packaged business solution. With first-of-its-kind integration and interoperability, the End-2-End Solution serves as the single source for the product development, production, distribution, and other critical business information that has traditionally been restricted to multiple stand-alone systems. With this unprecedented visibility and control, executives and teams are empowered to make better-informed and more-timely business decisions that drive sustainable competitive advantages.

The Visual 2000 End-2-End Solution comprises:

Visual PLM.net®	Product Lifecycle Management
Visual ERP.net™	Enterprise Resource Planning
Visual SCM.net™	Supply Chain Management
Visual WMS.net™	Warehouse Management System
Visual BI.net™	Business Intelligence and Planning
Visual B2B.net™	Business-to-Business Ecommerce
Visual B2C.net™	Business-to-Consumer Ecommerce
Visual C2B.net™	Click-to-Buy Ecommerce
Visual SFA.net™	Sales Force Automation
Visual CRM.net™	Customer Relationship Management

Visual 2000 leverages leading edge Microsoft® technologies to provide a familiar and configurable user experience that ensures user buy-in and maximizes productivity.

- Microsoft® .NET framework
